JUNIOR ECOLOGIST SYLLABUS

WINTER 2027

AGES 7–12 • MONDAYS 4:00–5:30 PM

WEEK 1 — **Field Biology & Microscopy** — Jan. 11

Enjoy a mindful walk around the Root 66 Garden. Learn field biology and begin microscope explorations.

WEEK 2 — **Native Plant Ecology & Adaptations** — Jan. 18

Discover native vs non-native plant ecology, identification, and fascinating adaptations.

WEEK 3 — **Farm Animal Care & Food Webs** — Jan. 25

Trace energy flow and study food webs through predator-prey dynamics and care for farm animals.

WEEK 4 — **Wildlife Surveys & Habitat Construction** — Feb. 1

Conduct wildlife surveys observing pollinators, reptiles, and local animals. Build beneficial habitats.

WEEK 5 — **Nature Art & Botanical Textures** — Feb. 8

Create beautiful, personalized artwork using natural textures, patterns, and botanicals found in the garden.

WEEK 6 — **Data Synthesis & Digital Storytelling** — Feb. 15

Input and synthesize field notes, snapshots, and observation data into collaborative digital storytelling.

WEEK 7 — **Research Showcase & Graduation** — Feb. 22

Present interactive research and stories to family and peers. Attend our graduation ceremony!
